SUMMARY

Results-driven Software Engineering undergraduate (Expected 2027) with a strong foundation in C++, Java, Data Structures & Algorithms, and Full-Stack Web Development. Experienced in engineering scalable web applications, real-time collaborative tools, and machine learning models. Seeking a Software Engineer Internship to leverage technical skills in high-impact projects.

EXPERIENCE

Freelance Frontend Developer

Jan 2026 – Present

Vijay Medical Store | vijay-medical.vercel.app

- Built and deployed a production e-commerce platform for a real client using React, Vite, and Tailwind CSS v4, improving Lighthouse performance score by 40% through lazy loading and code splitting.
- Developed a robust client-side product filtering system utilizing advanced React Hooks to efficiently manage state, supporting seamless navigation for 50+ product categories.
- Designed a stateless order pipeline integrating WhatsApp Business API to transmit cart data without a backend database, reducing infrastructure cost to zero while maintaining a 25% checkout completion rate.

EDUCATION

KIPM College of Engineering and Technology, Gorakhpur, UP (AKTU) Aug 2023 – May 2027 (Expected)

Bachelor of Technology (B.Tech), Computer Science & Engineering | CGPA: 7.8 / 10

- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Rishi International School, Jaipur

May 2023

Senior Secondary (Class XII), CBSE | 87%

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Framer Motion, Socket.io

Tools & Concepts: Git, GitHub, VS Code, REST APIs, WebSocket, Object-Oriented Programming (OOP)

DSA & Problem Solving: Arrays, Strings, Linked Lists, Stacks, Queues, Trees, BST, Heaps, Hashing, Graphs, Recursion, Backtracking, Dynamic Programming, Greedy Algorithms, Time & Space Complexity (Big O)

PROJECTS

CollabCode | client-sigma-murex.vercel.app | *React, Node.js, Socket.io, Yjs CRDT, Monaco Editor, Tailwind CSS, WebSocket*

- Designed a WebSocket-based real-time collaborative IDE using Socket.io and Yjs CRDT, supporting 10+ concurrent users with conflict-free document synchronization across isolated rooms.
- Integrated Monaco Editor to provide VS Code-level IntelliSense and autocomplete, and implemented a cloud compilation pipeline via JDoodle API with custom stdin support, improving execution speed by 30%.
- Architected secure isolated room architecture using Node.js with Socket.io namespaces, enabling private collaborative sessions with real-time state sync across all connected clients.

Vijay Medical Store | vijay-medical.vercel.app | *React, Vite, Tailwind CSS v4, Framer Motion, WhatsApp Business API*

- Built and deployed a full production e-commerce platform for a real freelance client, improving Lighthouse performance score by 40% through lazy loading and code splitting.
- Developed client-side product filtering using advanced React Hooks, supporting 50+ product categories with seamless navigation.
- Designed a stateless checkout pipeline integrating WhatsApp Business API, eliminating backend database dependency and achieving a 25% order completion rate.

SMS Spam Detection System | *Python, Pandas, Scikit-learn, NLP, TF-IDF*

- Developed an end-to-end NLP pipeline for SMS spam classification covering tokenization, stop-word removal, and TF-IDF vectorization on the UCI SMS Spam dataset.
- Trained and compared Naive Bayes and SVM classifiers, achieving 95%+ accuracy and high F1-score for reliable spam detection.

CERTIFICATIONS & ACHIEVEMENTS

Competitive Problem Solving: Actively solving DSA problems on [LeetCode](#) in C++ and Java, covering arrays, linked lists, trees, graphs, dynamic programming, and sliding window patterns.

Hackathon: Participated in Smart India Hackathon 2023, collaborating within a team to design and prototype innovative technical solutions under time constraints.
