Summary

Results-driven Software Engineering undergraduate (Expected 2027) with a strong foundation in Java, Data Structures, and Full-Stack Web Development. Experienced in engineering scalable web applications, real-time collaborative tools, and machine learning models. Seeking a Software Engineer Internship to leverage technical skills in high-impact projects.

Experience

Freelance Frontend Developer | Vijay Medical Store

Nov 2025 – Present

- Architected a high-performance e-commerce platform using React and Tailwind CSS, reducing average page load times by 40% and improving user retention.
- Developed a robust client-side product filtering system utilizing advanced React Hooks to efficiently manage state, supporting seamless navigation for 50+ product categories.
- Integrated a zero-database checkout pipeline by routing serialized cart payloads directly into the WhatsApp API, increasing order completion rates by 25%.

Education

Bachelor of Technology (B.Tech), Computer Science & Engineering

Aug 2023 – May 2027 (Expected)

KIPM College of Engineering and Technology, Gorakhpur, UP (AKTU)

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Senior Secondary (Class XII), CBSE | Rishi International School, Jaipur | 87%

May 2023

Technical Skills

- **Languages:** Java, Python, JavaScript, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Tailwind CSS, Bootstrap, Framer Motion, Socket.io
- **Tools & Concepts:** Git, GitHub, VS Code, REST APIs, Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)

Projects

CollabCode — Real-Time Collaborative 3D Code Editor

React, Node.js, Socket.io, Monaco Editor, Tailwind

- Architected a real-time collaborative IDE enabling 10+ concurrent users to write, sync, and execute code within secure, isolated rooms using Node.js and Socket.io.
- Engineered an interactive glassmorphic UI with a 3D spatial background and integrated Monaco Editor to provide VS Code-level IntelliSense and autocomplete features.
- Implemented a cloud compilation pipeline via JDoodle API, allowing users to compile code with custom stdin inputs, improving execution speed by 30%.

SMS Spam Detection System

Python, Pandas, Scikit-learn, NLP

- Developed a machine learning classification model to distinguish spam from legitimate SMS messages using end-to-end NLP pipelines covering tokenization and stop-word removal.
- Trained and evaluated Naive Bayes and Support Vector Machine (SVM) models, achieving a 95% accuracy rate and high F1-score for reliable spam detection.

Certifications & Achievements

- **Competitive Problem Solving:** Solved 100+ DSA problems on LeetCode, demonstrating strong proficiency in arrays, searching, sorting, and algorithmic optimization techniques.
- **Hackathon:** Participated in Smart India Hackathon 2023, collaborating within a team to design and prototype innovative technical solutions under time constraints.
